

Assembler – Full time

The assembler on the production line is responsible for assembling and manufacturing equipment, parts and electronic components. He may be called upon to inspect and verify assemblies, sub-assemblies, parts and electronic components to ensure compliance with established standards.

Responsibilities

- Weld and manually assemble various electronic components.
- Install, mount, fix, align and adjust components.
- Replace defective parts or repair and refurbish, if necessary, older devices.
- Check final assembly to verify finish, labeling and packaging methods.
- Locate and mark acceptable and defective assemblies.

Qualifications

- Training/ Experience/ Certification
- High school diploma (DES) or equivalent.
- On-the-job training is provided.

Knowledge and skill

- Knowledge of the manufacturing sector (asset).
- Ability to communicate well;
- Diligence and ability to work in a team;
- Versatility and flexibility;
- Rigor, concern for excellence and meticulousness;
- At ease in a dynamic and fast-paced work environment.

We offer our employees various benefits, including:

- Location easily accessible by public transport or by car with free parking;
- Competitive salary;
- Comprehensive group insurance program;
- Nespresso or freshly ground coffee offered, at your fingertips and at will;
- The opportunity to join a talented team, and share the excitement of strong business growth!

We look forward to welcoming you on board!

We thank all those who apply in advance, but only those selected for an interview will be contacted.
